## Quick Facts about Young Voters in Utah: The Midterm Election Year 2006

By Mark Hugo Lopez, Karlo Barrios Marcelo, and Jared Sagoff<sup>1</sup>  
Updated June 2007

The 2006 midterm election was the second major election in a row that saw an increase in the electoral participation of young people ages 18-29. Between 2002 and 2006, the percentage of eligible young people who voted increased by 3 percentage points to 25 percent, the single largest increase among all age groups nationally.<sup>2</sup> However, while youth electoral participation improved between 2002 and 2006 nationally, in Utah, the youth voter turnout rate fell 5 percentage points from 22 percent in 2002 to 17 percent in 2006. Overall, Utah ranked 49<sup>th</sup> among all states and the District of Columbia in 2006, down from 29<sup>th</sup> in 2002. This low level of youth electoral participation is in stark contrast to Utah's high level of youth volunteer activity. In 2005, among all 50 states and the District of Columbia, Utah ranked among the top five states in youth volunteering.<sup>3</sup>
