National Youth Survey of Civic Engagement 2002

Data Codebook

By Mark Hugo Lopez, Research Director

Introduction

This survey was fielded from January 29 to February 25, 2002. It contains responses from 1,166 15-25 year olds on 396 variables. It was designed and conducted by Molly Andolina, DePaul University; Scott Keeter, George Mason University and the Pew Research Center; Cliff Zukin, Rutgers University; and Krista Jenkins, Rutgers University (project manager). It was funded by The Pew Charitable Trusts.

This survey was one of three that formed the basis for the report [*The Civic and Political Health of the Nation: A Generational Portrait*](#), released September 19, 2002 by CIRCLE. The other two surveys that form the basis of this report are:

1. National Civic Engagement Survey I, Spring 2002

Fielded: April 4 – May 20, 2002;
Sample Size: N=3,246;
Population: Age 15 and older.

2. National Civic Engagement Survey II, Replication Survey, Fall 2002

Fielded: November 14 – 20, 2002;
Sample Size: N=1,400;
Population: Age 18 and older.

Both surveys can be accessed on the CIRCLE web page, and are publicly available.

Methodology

This was a nationwide Internet-based survey conducted by Knowledge Networks. A sample of members of the Knowledge Networks panel who met the age requirements for inclusion in our study (15 to 25) were asked to

complete an online questionnaire; 1,166 did so. The sample was stratified by education, with one group consisting of those currently enrolled in high school (N=312), a second group comprised of college graduates and those with some history of college attendance (N=336), and a final group of individuals who did not meet the criteria for inclusion in the two previous groups (N=528).

Using these Data

The National Youth Survey of Civic Engagement 2002 is available in three data formats: STATA version 8, SPSS Portable format, and SAS Transport format. Analyses with these data can also be conducted using our online Survey Documentation Analysis software.

Any analysis of these data require the use of a weighting variable. Weight variables for this dataset are:

- Use "weight" when analyzing the total sample.
- Use "pop_wt" when converting sample percentages to estimates of the actual number of Americans age 15 and older.

Some minor demographic discrepancies exist because certain items were asked on the questionnaire and were provided by Knowledge Networks from earlier screening questionnaires. Demographic data obtained from the screening questionnaires begin with "pp" at the end of the data file.

A copy of the questionnaire associated with this survey is attached to the end of this codebook.

When citing this dataset, please refer to it as the "CIRCLE National Youth Survey of Civic Engagement 2002." For more information, please contact Mark Hugo Lopez at mhlopez@umd.edu or (301) 405-2790.
